Email: 11941@coderacademy.edu.au

Profile

- A former screen printer and embroidery digitizer who enjoys building relationships with people
- Strong knowledge in MS Word, Excel, Photoshop, Corel Draw, C/C++, JavaScript, ReactJS, MySQL, Labview, HTML, CSS and repairing computers.

Experience

Screen Printer

Sept 2019-Present

Look Design and Digital Pty Ltd, Sydney NSW

- My duties at Look Design are stated in the following:
 - Reclaiming, coat and expose screens
 - Colour matching inks using the Wilflex IMS3.0 system.
 - Setting up or resolving screen printing jobs on automatic screen-printing machines.

Air Side Agent Team Leader

Nov 2017-Sept 2019

DNATA Cargo International Airport, Sydney NSW

- I managed the export section in the warehouse. I ensure that all cargo is checked in properly, these include X-ray, Explosive Trace Detection(ETD), dangerous goods, weighed or dimension checked.
- I also ensure we are well prepared for the shift with proper equipment and all jobs are assigned to individuals so all tasks are completed before the shift.
- I also have to solve any issues during the shift. Such as late delivery, mishandled cargo or wrong paperwork.

Production Manager

1999-Nov 2017

PT Alodia Indo Jaya, Surakarta Indonesia

- When I started, my first task was to increase the quality of the screen-printing.
- Build an internal LAMP stack that managed invoices, inventory, and production.

IT Manager

2005-2012

Challengers Internet Cafe

- Responsible for sourcing and maintaining hardware and software.
- I had to make sure over 110 client computers are running smoothly with low latency for internet gaming.
- Linked up 2 branches with a pair of Mikrotech 5GHz antennae.

Project Engineer

1998-1999

WindTech Wind Consultant, Sydney NSW

- I led a team of 2 aerodynamic engineers in Wind or Solar projects. These projects involved us in building models and placing them inside a wind tunnel. These projects included many skyscrapers in Asia and Australia.

- I designed and built a program to automate the wind tunnel. The program rotated the turning floor to the required position and recorded the data. Thereafter it would calculate the data.
- I also mentored an under graduate engineer for his thesis during his final year of university.

Education/License

Full Stack Development

present

Coder Academy Australia

- Expanding my knowledge in Front-End and Back-End technology.
- Learning the MERN stack.
- Agile Methodology.

Master of Business Technology

1999

University of NSW

- Object-Oriented Programming (Java/C++)
- Database Management System.
- Software Engineering Development.

Bachelor of Mechanical Engineering

1997

University of NSW

- Numerical Analysis Using Fortran-77.
- Automation and Data Acquisition using C-language.

Higher School Certificate, South Sydney High School

1992
